

## Slide to Safety with the Lockwood Sliding Door Closer

ASSA ABLOY

The global leader in  
door opening solutions.

## Lockwood Sliding Door Closer

Innovative and modern, the Lockwood Sliding Door Closer is available from ASSA ABLOY. When used with a suitable self latching device fitted 1500mm above floor level (latch included with purchase), the closer complies with The Fencing of Swimming Pools Act 1987. This means the home owner can have safety and outdoor flow without the hassle of a fence between the house and swimming pool.

Adapting technology from our well-known hinged door closers and applying the concept to sliding doors, the Lockwood Sliding Door Closer is hydraulically controlled and can be installed on new doors or retrofitted to most existing doors. Providing safety and convenience, the closer has been designed for easy installation and is available in the popular millennium silver finish.

### Features:

- Adjustable closing and latching speeds, adding to safety
- Backcheck
- Self latching device included (provides access from both sides of the door)

The Lockwood Sliding Door Closer suits the following door specifications:

- Roller supported, smooth running sliding doors
- Up to 60kg door weight
- Up to 2500mm high
- Up to 1200mm closing range
- 80mm minimum reveal width
