

ABLOY® EXEC CAM LOCKS

ABLOY® EXEC cam locks have a wide range of applications and are especially suitable for metal equipment, wooden cabinet doors and furniture. ABLOY® EXEC cam locks provide protection for parking meters, cash dispensers, vending machines, music and gaming machines, slot machines, cash and safe deposit lockers, coin-operated laundry machines, pay phones etc.

ABLOY® EXEC FURNITURE LOCKS

ABLOY® EXEC furniture locks provide original or retrofit security for office furniture, lockers, cabinets, storage chests, wardrobes, sliding doors, display cases and in many other applications.

ABLOY® EXEC PADLOCKS

An extensive range of high security padlocks to meet extreme, demanding conditions. All ABLOY® EXEC padlocks conform to the draft CEN standard. The ABLOY® EXEC padlock range includes both general purpose padlocks and maximum security padlocks with case-hardened steel bodies and shackles.

ABLOY® EXEC CUSTOM-MADE PRODUCTS

Where customers have specific requirements, Abloy willingly offers its know-how and expertise in the production of custom-made products and customized locking solutions to equipment manufacturers and professional end users.

ABLOY® EXEC HIGH SECURITY INDUSTRIAL LOCKS

The advanced ABLOY® EXEC high security cylinder provides extensive master-keying features and vast number of key combinations. It offers smooth and reliable operation and optimum resistance against physical attack. The ABLOY® system offers maximum key security with restricted, patented key profiles and key security levels.

THE SHEER EXCELLENCE OF ABLOY® EXEC

The **unique construction** of the ABLOY® EXEC detainer disc cylinder is virtually **pickproof** and provides a **vast number of combinations**. One of the principal features of ABLOY® EXEC is the **extensive master-keying possibilities** which combine **high security mechanical access control** and **convenient key use**. Locks from different Industrial Locking product groups can be master keyed into the same key system. **Optimum resistance against physical attack** is assured by using **case-hardened steel components**.

ABLOY® EXEC discs are controlled by the advanced **Disc Steering System** which contributes to its **easy, smooth operation** without the resistance usually associated with conventional pin tumbler cylinders. The **absence of pins and springs** ensures that ABLOY® EXEC provides both **durable and reliable operation** as the disc principle is resistant to the type of failure often caused by dirt and corrosion.

To guarantee **maximum customer security**, the ABLOY® EXEC system offers a **variety of patented key security levels**.

The **compactness** of the ABLOY® EXEC cylinder makes it ideal for most applications. The **comprehensive range of ABLOY® EXEC products** includes cam locks, furniture locks, padlocks and custom-made cylinders.

OPERATING PRINCIPLE

1. The key meets no resistance when it is inserted into the keyway. There are no spring loaded parts to wear out.

2. The correct key, when fully inserted and turned, allows rotation of the detainer discs to the correct position.

3. The locking bar is now able to enter the slot. The key can then be turned further to operate the lock.

4. To withdraw the key, it is turned in the reverse direction until it stops. This automatically scrambles the detainer disc combination. The key meets no resistance when being withdrawn from the cylinder.

MAXIMUM KEY SECURITY

EXTENSIVE MASTER-KEYING POSSIBILITIES
