

The world's favourite lock

	Easy to install	Details	Kits Contained in
	Siren Box	The siren box is fitted to the front of the property, in a highly visible position. It acts as a permanent visual deterrent. If activated, the siren will sound and the LED light will flash.	<ul style="list-style-type: none"> - Standard - Family - Premium
	PIR Movement Detector	PIR movement detectors are placed in the corner of rooms that could be vulnerable to intruders. When the alarm is set, the infrared sensor will pick up movement and activate the siren. <i>Pet friendly PIR will ignore movements from any animal less than 26kg.</i>	<ul style="list-style-type: none"> - Standard - Family - Premium <p>Additional detectors available to purchase separately if required.</p>
	Door/Window Contacts	Door/window contacts should be fitted to the interior of main access points. These are particularly suitable for homes with pets, where the use of PIR movement detectors may not be practical in some areas of the home.	<ul style="list-style-type: none"> - Standard - Family - Premium <p>Additional detectors available to purchase separately if required.</p>
	Keypad Controller	The keypad can be used to set or unset the alarm by anybody that has the required user access code. The keypad in the standard system is pre-set with a 20 second exit/entry period and will allow the entire property to be either armed or disarmed.	<ul style="list-style-type: none"> - Standard <p>Additional keypads available for use with all kits. Can be installed at an alternative entry point</p>
	Standard Control panel	The standard control panel features a digital display and can be tailored to the individual requirements of the home. The length of the exit/entry period can be altered to meet your needs and the system will allow you to arm parts of the property whilst disarming others. For example, part of the house may be disarmed whilst you are in, but you can still secure other areas such as the upstairs of the property, a garage or outbuilding.	<ul style="list-style-type: none"> - Family
	Telecommunicating Control panel	The telecommunicating panel performs all the functions of the standard control panel with the additional feature of alerting you by telephone should the alarm be activated. The system can store up to three telephone numbers, such as your home, mobile and work numbers and will call them in a specified sequence. The system can also be activated and deactivated using your telephone.	<ul style="list-style-type: none"> - Premium
	Dummy Siren Box	The dummy siren box is fitted to the front of the property, in a highly visible position. It acts as a permanent visual deterrent.	<ul style="list-style-type: none"> - Premium
Additional accessories available to purchase separately			
	Smoke Alarm	Activates your alarm in the event of a fire.	Available accessory compatible with all systems from 3000 and 6000 range.
	Remote Control Key Fob	Can be used to set or unset your alarm. Conveniently sized to fit on a key ring.	Available accessory compatible with all systems from 3000 and 6000 range.

The latest range of **wirefree security** alarms from **Yale**

60% of burglaries attempted on UK homes fitted with burglar alarms are unsuccessful.

Don't risk it – Yale it

No matter how well your property is secured with locks, fitting an alarm system will add peace of mind and an additional level of protection to your home.

Many people are put off by the high cost of some alarm systems, and the mess associated with installation.

Yale, the brand leader in home security has introduced a new range of three cost-effective home security alarms offering a complete alarm solution for your home, and external buildings such as garages and sheds.

Each of the three home security kits uses the latest in wirefree technology. Every component is easy to install, with no damage to décor and no need to disturb carpets. There is a home security kit to suit every type of home, all of which can be upgraded to suit your individual requirements with the complementary range of additional wirefree accessories.

The visual presence of a burglar alarm acts as a strong deterrent.

- No damage to home décor
- 100% wirefree
- Easy to install
- Simple menu system
- Expandable up to 20 devices
- Modern aesthetics
- Compact and slim line devices
- Compatible with all Yale alarm products (from 3000 range)
- 1 year manufacturer's guarantee. Extendable 3 and 5 year warranties also available at an additional charge

Standard Alarm

B-HSA6200

The Standard Alarm is a basic keypad operated system ideal for a flat, terraced, or semi-detached home. The keypad enables you to set or unset the alarm via an access code. The system is pre-set with a 20 second exit/entry period and will allow the entire property to be either armed or disarmed.

The kit contains:

- 1 x siren box with flashing LED
- 1 x remote keypad
- 2 x PIR movement detectors
- 2 x door/window contacts

For a more detailed description of the components in this pack, refer to the technical table overleaf.

Family Alarm

B-HSA6300

The Family Alarm is a fully functional control panel system ideal for a family home. The system features a digital display and can be tailored to individual requirements. The length of the exit/entry period can be altered to meet your needs and the system will allow you to arm parts of your property whilst disarming others. For example, part of your house may be disarmed whilst you are in, but you can still secure other areas such as the upstairs of the property, a garage or outbuilding.

The kit contains:

- 1 x siren box with flashing LED
- 1 x standard control panel
- 2 x PIR movement detectors
- 2 x door/window contacts

For a more detailed description of the components in this pack, refer to the technical table overleaf.

Premium Alarm

B-HSA6400

The Premium Alarm is Yale's top-of-the-range house alarm that will ring you when triggered - for the ultimate peace of mind. The telecommunicating panel performs all the functions of the standard control panel with the additional feature of alerting you by telephone should the alarm be activated. The system can store up to three telephone numbers, such as your home, mobile and work numbers and will call them in a specified sequence. The system can also be activated and deactivated using your touch-tone telephone.

The kit contains:

- 1 x telecommunicating control panel
- 1 x siren box with flashing LED
- 1 x dummy siren box
- 2 x PIR movement detectors
- 2 x door/window contacts

For a more detailed description of the components in this pack, refer to the technical table overleaf.
