

The Yale name has been synonymous with mortice locks for over one hundred and seventy five years. Today Yale offer a comprehensive range for both architectural specification and residential use. These include lever and cylinder locks, some kitemarked to BS3621 for use on external doors as well as standard variants for internal and general purpose doors.

FEATURES & FUNCTIONS

Deadlocking

Locking the bolt so that it cannot be forced back.

Automatic
(every time the door is closed it is deadlocked)

Key
(external operation)

Key
(internal operation)

Thumbturn

Bolt through fixing

Handles

Security Rose

Operating mechanism

the means by which the lock is operated

Lever

Euro Cylinder

Locking mechanism

the means by which the door is held closed

Latch

Deadlocking Latch

Deadbolt

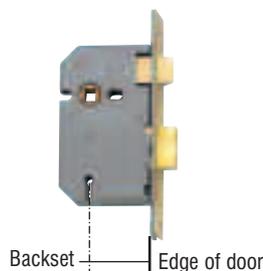

Clawbolt

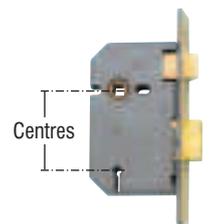

WHAT IS BACKSET?

- This is the measurement from the edge of the door to the centre of the keyhole.
- Locks with different backsets are available depending upon application.
- 2½" and 3" case sizes available.

WHAT ARE CENTRES?

- This is the measurement from the centre of the 'follower', which operates the handles, to the centre of the keyhole.
- In the UK this is commonly 57mm, although other sizes are available.

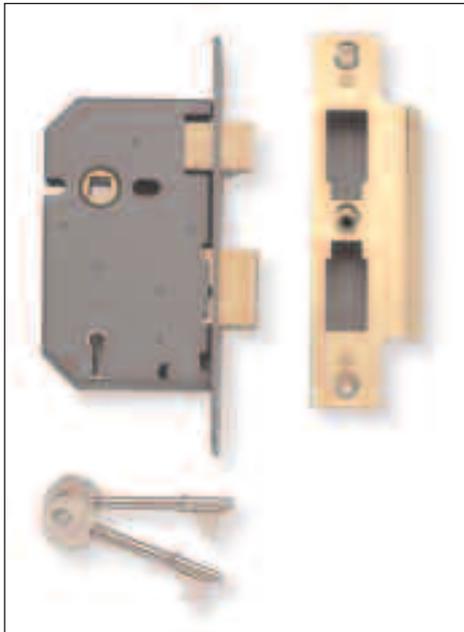

SECURITY RATING

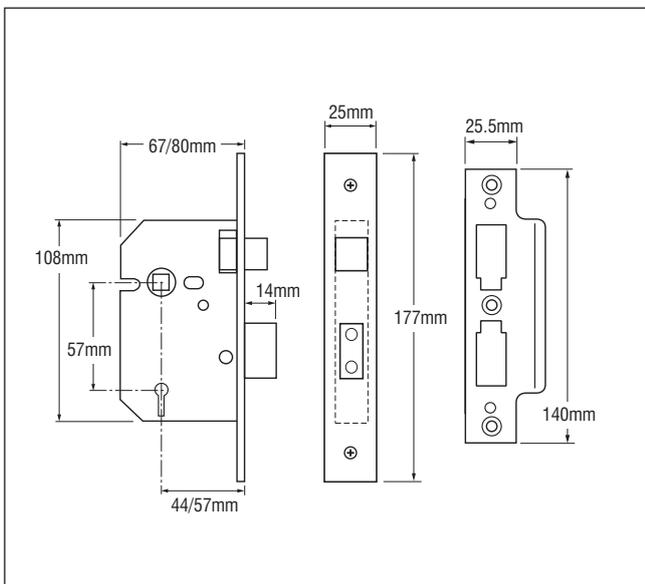

Throughout this section the product headers are colour coded to reflect the products security rating. These are as follows:

- **MAXIMUM SECURITY**
- **HIGH SECURITY**
- **STANDARD SECURITY**
