

Yale SmartHome Alarm.  
Home security just evolved.

Yale Digital. Clever Stuff.

# Yale SmartHome Alarm. Home security just evolved.

Like your phone, alarms are changing. Yesterday's on/off alarms are evolving into expandable home security systems that automate your home and put you in control. Yale SmartHome Alarm combines all this new technology with the convenience of Yale's wirefree connectivity, and the reassurance of Grade 2 professional installation in one future-proof package.

Yale SmartHome Alarm puts you firmly in control – and gives you new ways to protect your family and property.

You can even put your own MP3 files up as a door bell and greet visitors with a welcoming tune – or a barking dog!

Use the optional power controls to turn on a light upstairs when someone triggers the PIR in your back garden – or simply switch on the alarm remotely from your mobile phone when you realise you forgot to set it before you left.

With its beautiful touch-screen control panel, and user-friendly voice assist helping guide you as you use the system, Yale SmartHome Alarm is the future of alarm systems and takes home security to the next level.

Totally wirefree

Remote access

Appliance control

Lone occupant mode

User friendly voice assist

Professional Grade 2 System

For small or large homes

Fully expandable

Can you afford to be left behind?

Yale Digital. Clever Stuff.

The handy keyfob has a rolling code for added security and a lithium battery that lasts about 5 years. It can be carried with you as an easy way to arm or disarm your SmartHome Alarm, and enables you to hide your keypad away from prying eyes.

((( ))) Totally wirefree

**No mess, no fuss, no hassle.**

SmartHome Alarm uses Yale's Wirefree technology to make installing, extending and even expanding your home security as simple as possible.

- No need to hide wires
- No damage to décor
- Quick and easy to install in any home
- Add new sensors and modules as easily as putting up a smoke alarm
- Only the main control panel requires mains power

## Loads of great features...

Remote access/control

**Control your alarm from your mobile.**

Be there even when you aren't with remote access and control of your entire system from one phone call.

- Check the status of alarm remotely by phone for peace of mind
- Switch your alarm or appliances on or off by phone
- Alarm can call up to 10 telephone numbers when triggered by an alarm event
- GPRS extra uses an internal SIM card to call if the alarm is not connected to a land line

Appliance control

**Turn things on when you're not there!**

The most effective deterrent to any burglar is someone in the house. SmartHome Alarm can make it look like you're there – even when you're not!

- Optional power switches can turn lamps or appliances on or off automatically
- Control and link remotely via the handy keyfob
- Control by timer – for example, turn a lamp on at 6pm and off at midnight
- Control by other sensors – for example, when a PIR outside is triggered, a lamp turns on upstairs
- Control over the phone – set the alarm or control appliances from your mobile

Lone occupant mode

**A unique feature – ideal for people who live alone.**

Home on your own? Now you can set the alarm to monitor all the other rooms in your home while you rest easy, safe in your own room.

- A unique method to check all zones in the house – giving lone occupants peace of mind
- You can move around in one room while the system monitors all the other rooms for you
- No more worrying about a noise upstairs – now you know you're safe

Yale Digital. Clever Stuff.

...tailored to your specific needs.

User-friendly voice assist

### A friendly voice to help you!

Although SmartHome Alarm uses all the latest technology, it is designed to be easy to use, and comes with a friendly voice to help you every step of the way.

- Step by step help to navigate the menu system
- Over 500 voice prompts

Professional Grade 2 System

### Total peace of mind from Yale.

SmartHome Alarm conforms to the European standard for home alarms – so you know it's a system you can trust.

- Conforms to EN50131 Grade 2
- Shows you the alarm system meets Europe wide alarm standards
- We recommend this product is professionally installed

*Yale's SmartHome Alarm is designed to give complete peace of mind, and you should therefore talk to your professional installer about correct installation. We would not recommend DIY installation of this high security system.*

For small or large homes

### Built around you, ideal for any home.

Whether you live in an apartment in the city, or a mansion in the country – SmartHome Alarm adapts to meet your needs.

- Tailor made solution – customised to meet your specific requirements
- Can even extend your existing alarm if you want to keep the system that is already in place

Fully expandable

### Add extra stuff whenever you want.

SmartHome Alarm can support up to 80 separate sensors – more than enough to cater for the future needs of virtually any home.

- Supports up to 80 separate sensors
- 2 distinct areas with common sensors. For example, securing two independent flats using one system
- Up to 8 power switches for appliance control
- Up to 32 different users can be given access
- Includes one-off codes – ideal for cleaners and builders etc

The clever PIR sensors can be fitted anywhere to detect movement – inside or out. SmartHome Alarm even lets you programme them to automatically switch on a light upstairs when triggered – making intruders think someone is home!

Yale Digital. Clever Stuff.

Yale SmartHome Alarm can be used with a whole range of accessories, including:

- Control panel
- Exterior siren
- Keyfob remote control
- Interior and exterior PIR sensors
- Smoke detectors
- Portable keypad
- Panic alarm
- Door contact unit
- External doorbell
- Outdoor repeater unit
- Appliance power switches
- Wired zone extender
- Doorbell
