

Why

should you insist on
LOCKMASTER

High Security Hooks

Ensuring even distribution of weatherproofing and strength

Grade 304 Stainless Steel Faceplate

Delivering high levels of corrosion resistance, as standard

Quick Change Reversible Latch

Fast and simple handing for Lockmaster

Opposing Centre Hook

Optimizes anti-separation security

Optional Anti-slam Mechanism

Prevents accidental operation of the lock when open

Optional Laminated Shootbolt Extensions

Delivering enhanced performance for single and double doors

About Yale

world class

Yale is one of the oldest international brands in the world and one of the best-known names in the locking industry. The Yale history captures major innovations that have marked the evolution not just of Yale, but of the entire locking industry.

Yale has its roots in colonial America. The Yale family decided to emigrate to the New World from North Wales. A few generations later, about 1840, Linus Yale Sr., began designing and manufacturing a series of innovative, high security locks at his Yale Lock Shop in Newport, New York. He specialized in expensive, handmade bank locks.

Linus Yale Sr.'s son joined his father in the business in 1850 and perfected and patented his father's pin tumbler cylinder lock and became the considered locking expert of his time. In 1862, Yale Jr. introduced the Monitor Bank Lock, marking the transition in bank locks from

key locks to dial or combination locks. The principles, embodied in his Monitor Lock, are now standard in combination locks throughout the USA.

Yale's Lockmaster multi-point door locks have been produced in the heart of the historical lock building region of the United Kingdom since 1995. Produced using state of the art equipment and the highest grade materials, coupled with a continuous product improvement program and ISO9001:2008 accredited quality management systems, Yale ensures that all their products meet the latest standards and legislation, keeping them at the front of the hardware industry.

Why

should you be using multi-point door locks?

LOCKMASTER multi-point door locks

Security

Multiple anti-separation hook locking points deliver new levels of security

Conserves Energy

Chamfered locking points provide ease of use and combat door warping, maximising heat retention and minimizing energy waste

Weatherproof

Uniquely distributed compression loading guarantees an even weatherproof seal, eliminating drafts and rain ingress

Impenetrable

Strategically located high performance security hooks and laminated shootbolts, ensure compliance with stringent DP ratings

These locking mechanisms use the very latest Lift & Secure technology. Easy to use, and extremely secure.

Designed, developed and tested to deliver the very highest levels of performance for security, weatherproofing, ease of use and service life. Lockmaster multi-point door locking systems, employing Lift and Secure technology, ensure the very highest levels of performance where it matters.

- Guaranteed full engagement of all locking points
- Optimal weatherproofing
- Total control of operating forces (with adjustable strikers)
- Proven technology
