

P115 Lockable Window Handle Fitting Instructions

Tools Required

Crosshead
Screwdriver

Fitting Instructions

1. With the window closed, position the locking plate to the side frame at the desired height. The locking plate should be positioned so that the edge is flush with the opening frame and the step on the locking peg is facing away from the window. Fix with two of the screws provided.
Where window has a sloping face, use the angled locking plate supplied.
 2. With window handle unlocked, position so that it is covering the upper hole. Ensure that there is a gap of 3mm between the handle and locking plate.
 3. Using the remaining two screws, fix the handle to the opening frame. Fix the handle by first screwing through the lower hole, then open the window and screw through the upper hole in the handle.
- Note:** Ensure that the screws will not contact the glass.
4. Check the handle for correct operation.
To lock in the ventilation position, open the window marginally and position the locking plate in the second slot in the handle.

The world's favourite lock since 1843
