

# Elite Motorized Safe Series Addendum for Alarm System

**For Elite Safe models with alarm system:**

There is a high volume alarm installed in this safe. It will be triggered if 3 consecutive wrong codes are entered, or if the safe is under attacked by impact or with abnormal movement.

## 1. Turning On/Off the Alarm

Under the Administration Mode, enter 05 and then press  to toggle between the alarm on/off. (Default setting is On)

## 2. To Stop the Alarm Sounding

- If the alarm is triggered due to impact or movement, it can be stopped and unlocked by entering the correct user code or by a mechanical override key.
- If the alarm is triggered due to wrong user code is entered 3 consecutive times, it can be stopped and unlocked by entering the correct user code in the first minute. After that the panel will freeze for 2 more minutes and can only be unlocked by a mechanical override key.

### **Note:**

- The large volume alarm will drain the battery life of the safe. If it is triggered frequently, the batteries may need to be replaced sooner than their normal life span.
