

Yale®

P1109 & X5 Rim Cylinder Fitting Instructions

Tools Required

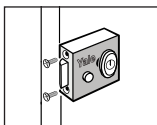

Flat Head
Screwdriver

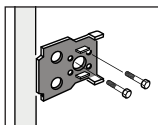

Hacksaw

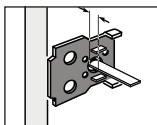

Fitting instructions

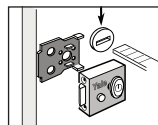

1. When replacing a cylinder, first remove the existing nightlatch from door.

2. Unscrew the existing connecting screws and remove the cylinder and ring that are to be replaced.

3. Insert the new cylinder through the ring and place in position. Secure with the two flat-ended connecting screws.
If necessary, use a fine-toothed hacksaw to shorten the flat connecting bar

4. Replace existing lock to door.
If applicable, align the arrow on the back of the case with the arrow on the rotatable slot.

CARE OF YOUR CYLINDER

Never take the cylinder apart. Never oil or paint the cylinder. To lubricate, use a Teflon based solution.
