

FITTING INSTRUCTIONS 8K100

● Fitting instructions

Prior to fitting, familiarise yourself with its simple action.

Caution before drilling or fitting screws, check position of glass and seals

Metal Widows (locking plate/plastic spacer not required).

1. Position lock body onto opening window installing as close as possible to fixed frame whilst ensuring window can still swing open, mark top fixing hole. Set drill depth, as shown in diagram (Fig 1) and carefully drill a 3mm (1/8") dia hole (Tip: Tape over hole centre will prevent drill slipping). Loosely fix lock to window with a "thread forming" screw. Insert slowly by hand keeping square to frame, lubricate for easier fix. (Fig 1)

2. With lock vertical mark bottom fixing hole, swing lock body aside to prevent damage and drill as above. Secure top and bottom screws. Do not overtighten. Check operation then fit plastic caps to conceal screwheads. (Fig 2)

Wooden Windows

3. Locate locking plate flush with fixed frame edge. Mark slot and chisel out 10mm (3/8") deep, (plate can be recessed if required). Mark top and bottom fixing holes and secure with short woodscrews. When positioning lock use packing spacer supplied, ensuring bolt will swing in and out of locking plate. Mark and prepare fixing holes and fit with longer wood-screws.

Different key variations are available, should extra keys be purchased then please ensure lock series number and key number match.

NB. Equivalent imperial sizes are appropriate.

Do not use abrasive cleaners, solvents or polish. Only use moist soft cloth.

The world's favourite lock
