## Quick Guide   *(continued)*

3 Securely Locking Your Door

≫ Inside : Press push button & lift the handle.
This can be done anytime and will always fully secure your door.

≫ Outside : Close the door and lift up the handle within the set connection time
Once the lever disengages you must enter your PIN or press remote and
lift up the lever within the connection time to securely lock your door.

**Linked**   Front handle engage

Within
⚠ If the time expires you need to
re-engage the handle to securely lock
your door. You can re-engage by
pressing the remote, pressing the
inner lever down or entering your pin.

Unlinked   Front handle not engaged after
the outside handle disconnected

INSIDE
PIN   (Optional)   Within

※ **Exception :** In the Passage mode,
the handle is operable all the time.

※ The automatic disconnection time can
be varied by user setting.
Refer to section "settings".

⚠ **IMPORTANT**   Your door is only securely locked from the inside when
the inside lever is lifted up & the voice instruction
"lock closed, securely locked" is heard & red LED shows.

2 Fixing Cylinder

Ⓔ

Ⓔ

Ⓕ
Cylinder fixing screw

※ Lightly tighten the cylinder fixing screw.

3 Fitting the Spindle ※ In case that the main unit includes the spindle already, please skip step 3.

Ⓑ   Ⓗ
Ⓖ

Back
Front

※ Insert the spindle into the main unit.

※ After fully inserting the spindle, push the snap fit washer down until 'click' sound is heard.
※ Check that the spindle free rotates.

4 Fitting the Handing Screw

※ Before fitting Key Free, the handing screw must be fitted. Failure to so will allow the outside lever to rotate. Only use the handing screw provided which is attached to the underside of the outside lever in a bag with a yellow warning label.

IMPORTANT

※Check the arrow is on the side.

※Take care not to damage spring when fitting inside handle

6 Check Points after Installation

① Insert Batteries

② Insert Remote Control(Optional) module

⚠️ Take care inserting the Remote Control(Optional) module.
The pins can easily bend and may not be replaced under warranty
③ **Inside Lever Voice Handing**

When an inside lever is fitted to LH side of door, voice handing will be correct.
No further action required.
When an inside lever is fitted to RH side of door the voice instruction will be opposite.
Eg "lock closed securely locked" when opening the door.
Follow the simple procedure below to set the correct voice handing.

(I)	→	#	→	(P)	→	#	→	🔧	→	🔧	→	(I)
INSIDE		OUTSIDE		INSIDE		OUTSIDE		INSIDE		INSIDE		INSIDE

④ Check The Mechanical Back Up Key Works Properly

- Turn key to 90 degree.
- Press outside lever down & open door.
- Remove key

⑤ Check the free movement of both inside & outside levers

- Check the operation of the inside handle child safety / security button handle.
  The inside lever must not move unless the button is depressed.
 When the inside lever returns to horizontal, the button must re-engage to prevent use.
  ※ If the button does not re-engage, please slightly lift up the inside lever to re-engage.

## Quick Guide

1 Registering Your PIN Code

Family code is the code that you and your family remembers as your PIN.
The visitor code can be given to guests or work people. Once guests or work people have
left you can change the visitor code without you or your family learning a new one.

① Press [I] (Registration) button

② Enter Family code (4 to 12 digits)

③ Press (#) button to register

④ Enter Visitor code (4 to 12 digits)

⑤ Press (#) button to register

⑥ Press [I] (Registration) button to complete

※ If you want to use just one PIN Code for family, then skip the ④~⑤th steps and press Registration button.

2 Registering Your Remote Controls (Optional)
Please press the 2 marked buttons shown at
the same time for 3 seconds to register,
The remote LED will show red

① Press [I] (Registration) button

② Register all remote controls you wish to register one by one

③ Only press [I] (Registration) button to complete after all remotes have been registered
