

Keyless Digital Lock

Keyless Digital Lock

Do you sometimes wish you could leave your house without having to take keys with you?

With the new Yale Keyless Digital lock you can do just that!

The touch screen pad gives you an easy and convenient way of opening your door. There's NO Keys, NO Hassle, NO fuss all you have to do is remember your own unique pin number.

You can even create a visitor code to give other people access to your home when you want to, this code can then easily be deleted without having to worry about collecting keys or changing locks. Prevent others from identifying your pin code during access, the fake PIN code function confuses the onlookers but at the same time allows you to still gain entry.

The Yale Keyless Digital lock is secured by a mechanical nightlatch located on the inside of the door with a battery pack containing 4 x AA batteries.

Unlock your door up to 10,000 times with one set of batteries. If the batteries reach a critical level a low battery indicator will illuminate reminding you to change the batteries.

In the event of your battery going flat you have two battery contact points enabling you to fit a 9V battery to power the lock temporarily to enter your pin and gain access.

For additional convenience, the lock has a memory feature so that you do not need to re-program your PIN numbers when changing batteries.

Open your door at the touch of a button

Features & Benefits

Touch Screen Keypad

The touch screen keypad has no mechanical buttons which means no trace of your secret pincode.

4-12 Digit Pin Code

Choose a pin code from 4-12 digits which eliminates the use of keys, making it ideal for the whole family.

Low Power Consumption

Unlock your door up to 10,000 times with one set of 4 x AA batteries.**

Outdoor Weather Resistant Keypad

The keypad is designed to withstand all weather conditions, having an IP protection of 5,5.

User Codes and Setting Remain if Batteries are Replaced

The settings and codes will remain programmed in the lock in the event the batteries are depleted.

Fake PIN code

Prevent others from identifying your pin code during access, the fake PIN code function confuses the onlookers but at the same time allows you to still gain entry.

Low Battery Warning

When battery reaches critical level, a low battery indicator will come on reminding you to change the batteries.

Emergency Battery Connection

In the event your battery goes flat you have two battery contact points that fit a standard 9V battery, enabling you to temporarily power up your lock allowing you entry.

Convenient

Wireless, battery operated and retrofits with most 60mm nightlatches.

1 Touch with Palm

2 Enter PIN Code

3 Press * Button
